

Postdoctoral Position in Cybersecurity

We invite applications for a postdoctoral researcher position in Cybersecurity in the Department of Computer and Information Science. This position requires a Ph.D. in Computer Science or a closely related area with a specialization in cybersecurity. Those with expertise in network security, software security, cyber-physical systems, computer forensics, wireless security, biometrics-based security, e-Systems Security, and related areas of cybersecurity are encouraged to apply. This postdoctoral researcher will conduct high-quality research in cybersecurity and teach courses for MS program in Cybersecurity. The selected candidate can apply and compete for a tenure track position that will be available next year.

How to apply: Send a detailed CV, research statement, teaching statement, and a list of info of 3-5 references with e-mail addresses in a single pdf file to sbhatia3@fordham.edu. Include job-code "POSTDOC-Cybersecurity" in subject line. Review of applications will begin immediately and continue until the position is filled.

The Department of Computer and Information Science is currently in the process of expanding its undergraduate and graduate programs in order to serve students entering the growing fields of computer science, information science, and interdisciplinary areas. Fordham's administration is committed to increasing the department's local and national distinction in research and science education. Additional new members will join the faculty in the coming years to build upon the faculty's wide range of expertise and to serve new programs.

The faculty of the Department of Computer and Information Science represent a wide range of academic backgrounds, research and professional interests. Serving undergraduate majors in computer science, information science, and interdisciplinary programs in Fordham College at Rose Hill (Bronx), Fordham College at Lincoln Center (Manhattan), and the School of Professional and Continuing Education (all 3 campuses), the department also offers an MS program in Computer Science in the Graduate School of Arts and Sciences and an MS in Cybersecurity in the School of Professional and Continuing Studies. An MS program in Data Analytics is in its final process of development.

In the thriving metropolis of New York, these programs are ideally situated for education and productivity in the computer and information sciences and industries. The department has a rich network of professionals and organizations, including loyal alumni, throughout the Metropolitan area, and students benefit from research, internship, and career opportunities afforded by the city's vast resources.

Fordham University. With over 14,500 students in its 13 schools, Fordham's Carnegie classification is Research University (High Research Activity). U.S. News & World Report currently ranks Fordham 57th nationally, placing it among the Tier 1 universities. Fordham's New York City campuses in the center of Manhattan and the Bronx avail faculty and students of extraordinary resources for education, research, and service. Fordham offers its students a highly dedicated faculty, a productive research environment, emphasis on ethics and social justice, and respect for all individuals, religions, cultures, and creeds.

Fordham University is an independent, Catholic University in the Jesuit tradition that welcomes applications from men and women of all backgrounds. Fordham University is committed to excellence through diversity and welcomes candidates of all backgrounds; it is an equal opportunity employer.
